Municipal Water Services Connections

---

20338 65 Ave., Langley B.C. V2Y 3J1

Phone 604-533-6018

---

Effective immediately, the Township of Langley has a new procedure for the tie-in of private water distribution systems to the Municipal Water System including the activation of the water system on private properties.

The tie-in to the Municipal Water Service for commercial, industrial, institutional, multi-family and all other development sites which require water meters must not be made until authorized by the Building Department. The new procedure is that the Building Department will forward the authorization to Eng. Dept. to arrange for the connection of the water by the Water Works Department. Connections will no longer be permitted by personnel other than the Township of Langley Employees.

Before authorization is forwarded to the Development Engineering Inspector, Forms 1 and 2, signed and sealed by the Professional Engineer supervising the on-site works, and all other related documentation must be completed and submitted to the Building Department for approval.

Applications that do not have a servicing agreement may be required to attend the Eng. Dept. counter to pay for, an estimate only, connection fee. Additional fees or refunds will be determined once the connection has been complete.

For further information please check the Notice to Builders - Municipal Water Services Connection at [www.tol.ca](http://www.tol.ca) Follow the link through to Municipal Services - Community Development - Permit, Licence & Inspection Services Department.

For further information please contact Permit, Licence & Inspection Services Department at 604 533 6018.
