

DECEMBER 7, 2021 BUILDER FORUM SERIES: WHAT WE HEARD FROM YOU

Topic: Strategies for Airtight P3 Buildings
Attendance: 142 attendees
Survey respondents: 48
Presenters: Einar Halbig, E3 Eco Group

Level of satisfaction with webinar:

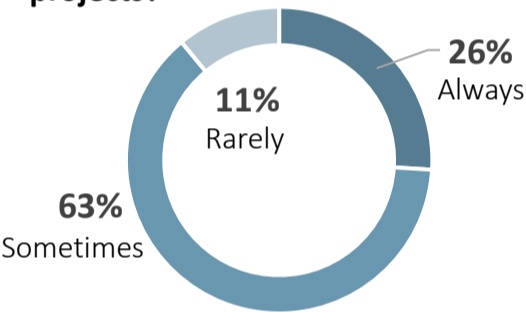

"The whole webinar was interesting"

"Importance of educated and skilled trades [to achieve airtightness goals]"

"[Main takeaway from this webinar was] what is involved in the airtight testing process"

Do you use an IDP approach on your projects?

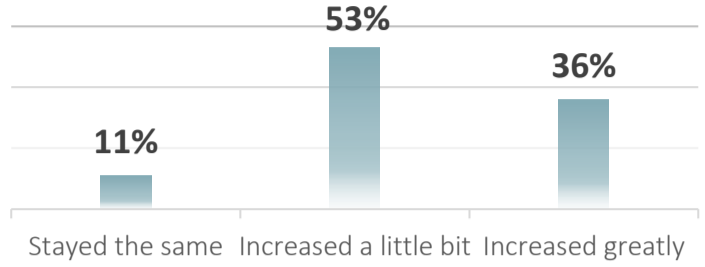

"Early collaboration is key"

"[Most valuable part] – Q&A time"

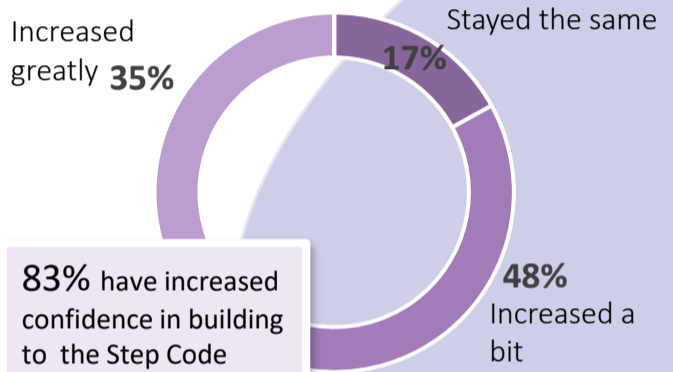

"Comprehensive planning and skilled workers must all contribute to an integrated plan in order to ensure success in airtightness standards"

Has your knowledge of strategies for building airtight Part 3 buildings increased?

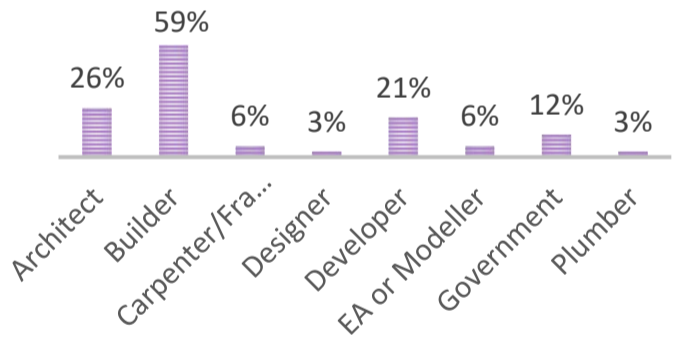

"Currently building a MURB and it was beneficial to get insight into the steps necessary to monitor airtightness and subsequent testing"

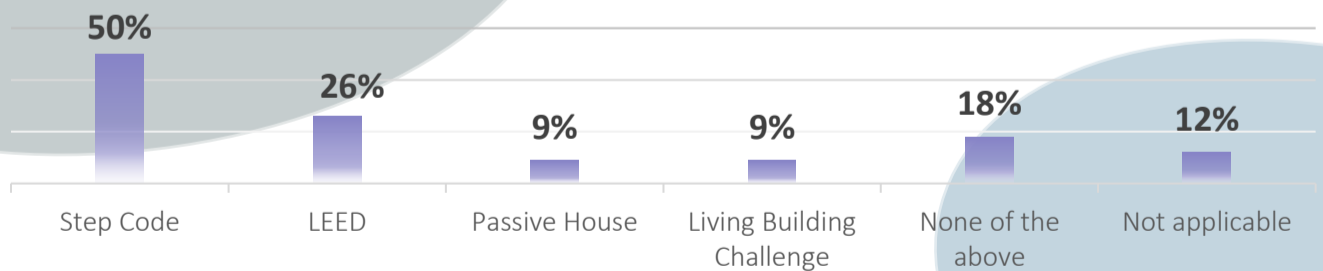

Has the webinar increased your confidence in building to the Upper Steps of the Step Code?

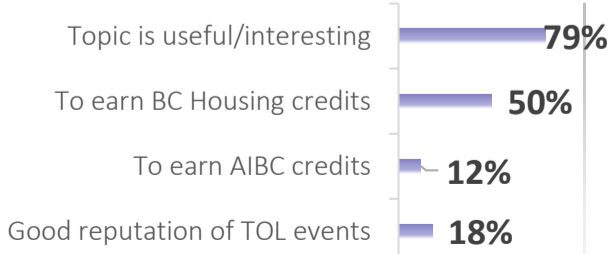

Attendees were a part of many different industries:

Which green building standards do you have experience constructing Part 3 buildings to?

Why did you attend this event?

Constructive feedback:

"More case studies"

"Discussing better planning or strategies to implement the details"

"More examples of good details for the typical problem areas in achieving airtightness"
