

JANUARY 27, 2021 BUILDER FORUM SERIES: WHAT WE HEARD FROM YOU

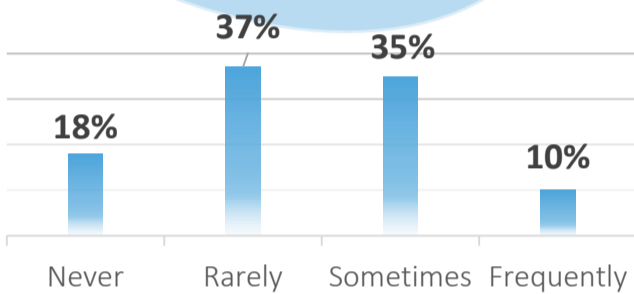

Topic: Ventilation and Step Code
 Attendance: 164 attendees
 Q&A: 12 questions followed up on
 # of Survey respondents: 52
 Presenter: Focal Engineering

Level of satisfaction with webinar:

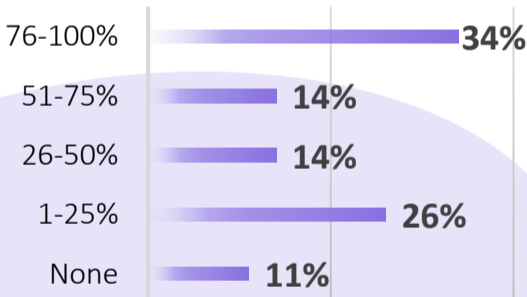

“Don’t over ventilate. Use good heat recovery.”

Do owners ask for an HRV/ERV to be included in their buildings?

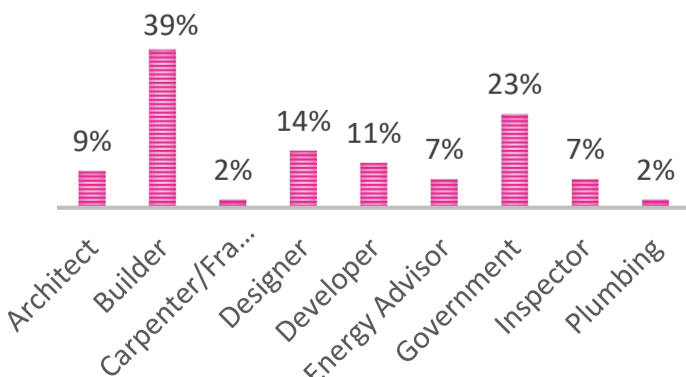

“Well spoken presenter who made the information relatable and not overly technical.”

What percentage of your buildings have included an HRV/ERV?

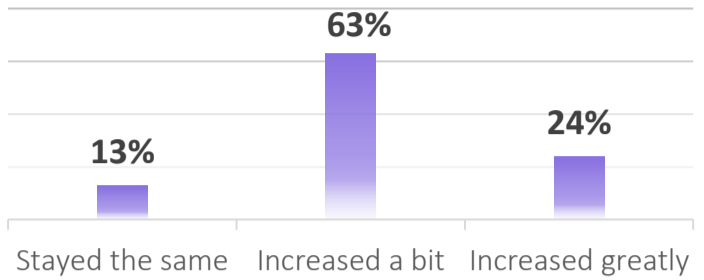

“Ventilation takes up approx. 40% of TEDI. Therefore if ventilation is designed properly, it will help the building meet Step Code.”

Attendees were a part of many different industries:

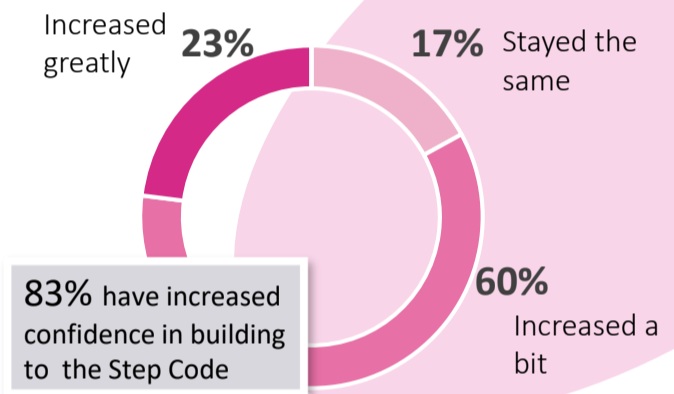

Has your ventilation knowledge increased?

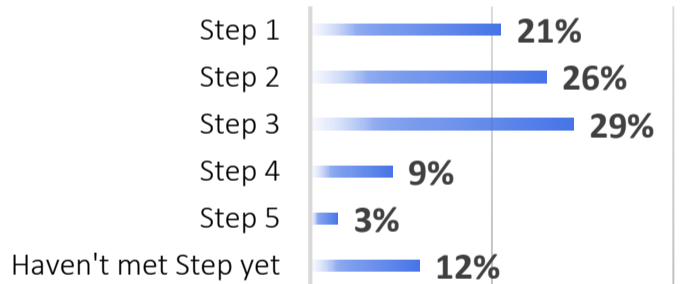

“The charts illustrating the impact of ventilation and heat recovery in relation to other building components was illuminating. Also appreciated a very clear presentation of ideas and practical solutions.”

Has the webinar increased your confidence in building to the Upper Steps of the Step Code?

What is the highest Step home you have completed?

Constructive feedback:

“Sometimes the owner does not want to spend the extra [money] for an HRV when a bathroom fan will do.”

“Add some examples or practical.”

“[More] case studies.”

“More information regarding single family homes and achieving Step Code compliance. Spent too much time on multi-family and corridor/common area discussions.”
