

## Candidate Statement

Charlie Fox

I believe student learning, student safety and preparing students for a future in a changing world is the focus of today's education system. As a trustee you oversee policy, programs and employee groups who work together to provide that safe enriching environment for the students to learn. In today's world the learning agenda needs to be focused on literacy, numeracy and technology. Students don't learn the same way or at the same speed, as a trustee your role is to ensure there is support for all student learning needs through the Universal Design for Learning support system. As a trustee you must ensure programs are in place emphasizing reconciliation, inclusion and anti-racism.

With over 33 years in the teaching profession, 13 years of governance experience with the TOL and a wealth of experience and commitment to community service, I am prepared to meet the trustee role expectations.
