

Candidate Statement

Gail Chaddock-Costello

Langley has a long, rich history and a legacy worth preserving for our children. Our recent growth has sparked numerous debates and produced legitimate concerns. We have new neighbourhoods where many residents feel they lack essential amenities. At the same time the impact of rapid development is also affecting established neighbourhoods, rural and urban. Everyone is suffering the unwanted side effect of increased crime. Taxes are high and rising and all communities want to

see value for their dollars.

Climate change makes the protection of our environment – rivers, streams, aquifers, flood management, forests, and the protection of our precious farmlands ever more urgent.

I believe we can plan smarter, listen better and incorporate visionary solutions into our Township Council plans. I have a long record of transparent, ethical leadership and would be honoured to represent you, advocate for you, on Township Council.

Please consider voting **Chaddock-Costello** on October 20, 2018.
