

# Candidate Statement

Richter Kim

Langley is at a critical turning point. It has nurtured many generations/families but we are growing so quickly now without full consideration of the importance of “Quality of Life” over “Quantity of Development”.

We need to focus on ethics, transparency/accountability of Council, affordability of taxes and housing, safety (fire, police, food, water), preservation of our green spaces, trees, agricultural land, heritage, and wildlife. We need our local politicians to protect what keeps our community so unique. We need balance.

I am a 34-year resident of Langley, mother of 3, wife, volunteer, Professor of Business Management and 6-term Councillor. I believe in this community, its tremendous potential, and its future. I want this great community to last and grow responsibly for our children and grandchildren.

I have and always will stand up and speak out for our community first.

I respectfully ask for your vote again on October 20, 2018.
