Rod Ross

Growing District Needs New Schools

I am concerned about our future. I can see a future need for facilities in particular in the Willoughby area where growth is going through the roof.

Earthquake Preparedness.

Langley Schools have appropriate emergency preparedness protocols in place and yet they have not been tested. I am concerned that we are ill-prepared for the "Big One". My belief is that schools will be expected to support the broader community that it lives within. Therefore our level of preparedness needs to be elevated to go beyond our school walls.

Cyber Security Risk

Warren Buffett says, **"Cyber is uncharted territory and it's going to get worse not better."**

I regularly ask for updates on our cyber-security status in our audit/finance committee. As the world struggles through this we need to ensure the safety of our computer information systems to protect sensitive personal information.
